

Public health data analyst: analyzing public health and medical related data to improve the health of people.

I am a public health specialist with 5 years of experience, and I am seeking new opportunities as public health data analyst or biostatistician in the field. I am a cooperative and well-spoken professional. I educated thousands of people about health between 2016 and 2018. I got biostatistics distinction in my master degree in 2019. I trained 19 medical students on job for contact tracing of covid 19 in 2020. I am skilled in data analysis, public speaking and English(intermediate)

### **5.3. Workplace violence among the respondents**

**Figure 2. Workplace violence among the respondents (n=150)**

Here is a sample of result that I analyzed in 2020 for my research of workplace violence among health staff. The result of this research is interesting and informative. It highlighted the problem of workplace violence among health workers and encouraged the policy maker to do implementation to reduce such problem. I am delighted to explore such informative result in order to help health staff.

**Education**
